Sponsor - National Grid - Power Responsive

As the electricity System Operator, National Grid's role is to balance supply and demand on a second by second basis. The system we are operating is in the midst of significant change, in particular on the supply side. The growth of renewable energy sources, such as wind and solar is increasing, just as fossil fuel generation is decreasing. Whilst this presents a challenge to National Grid, it also presents a great opportunity to industrial & commercial customers. National Grid's Power Responsive seeks to facilitate and shape the growth of demand side flexibility collaboratively with stakeholders from across the industry.

B44 - Norvento UK

Norvento Enerxia is a group of companies active in the energy sector since 1981. It currently focuses on three major areas of activity: i) Our Energy Services practice, which aims to reduce our client's energy costs through the integration of renewable energy, storage, and energy efficiency technologies in private micro-grids; ii) Our Renewable Energy Development practice, which focuses on the development, construction, and operation of renewable energy plants; and iii) Our Technology Manufacturing business, which focuses on the design, manufacturing, and sales of renewable energy technology.

SYSTEMATIC FURTHER DEVELOPMENT OF ENERCON'S HIGH QUALITY PLATFORM STRATEGY

ENERCON has achieved this year an important milestone in the UK with the installation of its first 1 GW. ENERCON's wind energy converters have been the benchmark for innovative technology and best quality products. Due to constant further development of all turbine components and the continuous improvement of our core competencies, new turbine generations with top technological features and intelligent grid technology for Multi MW, FIT, Business self-consumption/net metering and Community projects.
