

[Xforce Keygen FBX 2007 Portable](#)

The screenshot shows the Oracle Java Platform Standard Ed. 7 API documentation for the `java.nio.file.Paths` class. The page title is "Class Paths". It lists the package as `java.nio.file.Paths` and shows the class declaration: `public final class Paths extends Object`. A description states: "This class consists exclusively of static methods that return a Path by converting a path string or URI." The "Since:" section indicates the class was introduced in version 1.7. The "Method Summary" section includes a table of methods:

Modifier and Type	Method and Description
static Path	<code>get(String first, String... more)</code> Converts a path string, or a sequence of strings that when joined form a path string, to a Path.
static Path	<code>get(URI uri)</code> Converts the given URI to a Path object.

Below the table, it lists "Methods inherited from class `java.lang.Object`": `clone, equals, finalize, getClass, hashCode, notify, notifyAll, toString, wait, wait, wait`.
